Who am I?

I consider myself to be creative, very good at problem solving and a fast learner. Got my software engineer degree when I was 20 years old, and after that I did some Udemy Courses that helped me specialize in Web Development, both Front End and Back End. Since then, I'm working now in this area for 3+ years, where I had the opportunity to develop myself in all sort of ways. Besides my professional life I'm a very active person, I'm part of multiple cultural associations and also an amateur musician.

Professional experience

Thalox – Front End web developer

02/2022 – 03/2024

Since this job was a startup starting from the zero, I was a mix of UI/UX designer, Full Stack developer, and DevOps. Firstly, when I joined the company, I got the task to research and design the whole UI, using tools such as Figma and Gimp. Besides the designer role, I took control of everything that was Front-end related, building a product website React, a marketing website using Next and email templates using MJML. At the same time I was working on the backend, where we were using Node in conjunction with a lot of AWS services in order to speed up development.

Audiçãoactiva – Full Stack web developer

12/2020 – 01/2022

In this job, I had the opportunity to set up multiple apache2 web servers and maintain them, to build 1 React and 2 WordPress websites, one of which was an ecommerce website, and also to manage a huge SQL database and build all the APIs and webhooks needed using Node and TypeScript.

ArcosAtlier – Front End web developer

06/2019 – 09/2019

This was a summer job, while I was still in college. I worked for an architecture company where, first my role was to organize everything and automate all repetitive processes that an architecture process needed. I also built a website with only HTML, CSS, and JS with the Google Maps API. When a client first came to the company, he would draw his property on the map and the site would calculate the total area that the client could build in that area.

Side Projects

Musician

I'm a musician in a band called Colmeia, and I'm also part of the musical group Gaiteiros de Bravães.

Cultural Events

Organization of multiple cultural events related to music, theatre, cinema and dance. From where I highlight Monster Summer Break and Anda à Varanda.

Visual Joker

Perform as a VJ with 2 music groups Alegria Lima and Paradigma, but also with a solo artist, MadMan.

Volunteer

During the COVID 19, where I, and a group of personal friends started to build face shields and face masks so we could offer them to public institutions such as Hospitals, nursing homes, fire and police stations, etc.

Rugby national champion

I was a rugby player from my 14 to 19 years old, and was able to win the portugues U18 national championship in 2017.

Luthier

Due to being a musician that really enjoys traditions, the part of building my own instruments was always present so I already built multiple instruments such as bagpipes, rabel, multiple flutes, and recorders.
